MINING, BUSINESS AND STOCKS

MORNING SALES ON STOCK EXCHANGE

Daly-Judge Comes in for a Boost And Rose to \$4, but Afterwards Declined.

DALY-WEST REMAINED FIRM.

Consolidated Mercur Continues Its Slide On the Toboggan-Naildriver a Seller on the Cpen Board.

The morning session of the mining exchange was not a very animated one; yet there was a little enthuslasm mustered among the lower priced stocks. The Park City favorites were somewhat stronger than yesterday, and while Daly-West did not participate, there were a number of buyers in the pit seeking Daly-Judge, which sold up to \$4 a share, afterwards weakening with offers made at \$3 80 on the open board. Consolidated Mercur came forward weaker and was scarcely wanted at any price at all. The first sale made dur-ing the regular call was at 68% cents dropping to 65 cents on the open board. Silver Shield exhibited addi-tional strength and altogether 2,200 shares were transferred. Naildriver sold on the open board at an advance, The closing quotations and sales were

posted as follows:

PROSPERITY IN OREGON.

The Year 1903 Closed With an Enviable

Record to Credit of Sumpter District. Something of the prosperity enjoyed by the eastern Oregon mining regions can be judged from the following, taken from the Blue Mountain American of Sumpter:

"Twenty-three new milling plants were ordered and erected in the eastern Oregon mineral zone in the year 1903, having 166 stamps, and rolls mills equivalent to 96 stamps, or a total of 262 stamps. This work was distributed over 23 separate and distinct properties, Some of the mills were completed during the year, while others were but or-dered for delivery at the earliest possible date this winter or next spring. The increase to the milling capacity of the district by this work is 1,025 tons. At the same time a 150-ton furnace smelter and 750-ton sampling mill was erected at Sumpter, a 100-ton furnace and sampling mill is being put up at Homestead, and a 100-ton roasting and leaching plant is being erected at Eureka. This total work gives a very large increase to the reduction capacity of the district, with corresponding promise of increased output for Oregon."

GREAT IS PARK CITY.

Last Year 136,355 Tons of Ore Were Shipped from the Camp's Mine.

The Park City Record sums up the events of the past year in that grand old camp in the following: Another year has now been added to the great past. A year of achievement, progress and prosperity throughout the country and one in which Park City has made a grand record. Great is Park City and growing greater day by day, proving to be almost marvelous and capable of producing untold wealth. The showing made by the mines of the state this year is truly great, and it speaks well for Park City to be able to say that it is responsible for much of the greater part of this showing. Instead of showing signs of working out, the great mines of our camp are grow-ing richer and larger, are producing a greater quantity and richer quality of

ore as time goes on. "An idea of the enormous amount of work done during the year is given by the tonnage of ore shipped from our producers. Following is the gross weight in pounds handled at the Park City sampler:

 Ontario
 4,615,000

 Daly-Judge
 1,250,000

 Comstock
 879,000

 California Creole Barnes Bros.....

"Add to this the Silver King's output of 97.343,220 pounds, and the grand total of 272,709,220 pounds is reached—certainly a remarkable record. The King's output this year exceeded that of last by 13,091,620 pounds, and gains were made also in the shipments of most of the other properties. The camp's past record is one to be proud of, and remarkable though it is, with the development of numerous properties is held forth for the future, and 1904 will doubtless see the Park's greater progress and prosperity. Great is Park City, to be sure.

ALONG MOFFAT ROAD. Fine Exposition of Anthracite Series,

Upon Pilot Knob, in Colorado.

The Pilot Knob plateau, beneath which are some of the finest exposi-tions of the anthracite series, is a lofty plateau some 2,600 to 3,600 feet high surmounted by a prominent knob of lava, which may be a relic left by erosion of a thick laccolitic intrusive sheet called the Pilot Knob. The bulk of the mounin below the knob is composed of eavy bedded soft yellow sandstone ad shales, nearly horizontal. Lying nformably with these beds are sev al coal seams, prominent among hich are an upper series of bituminis coals from 5 to 14 feet, aggregat-g about 20 feet of workable coal of cellent quality. Lower down and earer the base of the mountain are series of seams from 30 inches to 9 of 14 feet thick. it is these lower ams that have been more or less anracized by the contiguity of inusive sheets of lava, which appear to ave emanated laterally from dikes ertically traversing the formations, and forming feeders to the main laccosheet of the summit coposing the The accompanying approximate ction illustrates in a general way the ive position of the bituminous and thracitic coal series,-Prof. A. Lakes an article in January Mines and

COLUMBUS CON. OFFICERS. B. Jeffs Succeeds His Brother as a

The following officers and directors the meeting of the e: chosen at ockholders of the Columbus Consoliated Mining company yesterday: Tony acobson, president and general maner; Clarence K. McCornick, vice esident; Arthur E. Snow, secretary and treasurer; B. F. Chenoweth and W. B. Jeffs of Rockland, Mich., directors The only change in the board was the of W. B. Jeffs in the place of

his brother, L. A. Jeffs. COPPER NEAR LUCIN.

Tunnel Taps a Good Copper Ledge in the Giant Copper Queen Mine.

Over on the west side of the Great Salt Lake, directly west of Ogden and bout 10 miles from the new station of Lucin, on the Southern Pacific railway, is located the properties of Gaint Copper Queen Mining company, Charles A. Dugger, the manager, came down from camp yesterday, loaded down with samples of ore taken from the vein opened on that property, which indicate that the mine has a very promising future before it. The prop-erty is being worked by a tunnel which has been driven a distance of 1,020 feet, at which point a ledge was tapped, showing a width of no less than 13

The property is located about three miles from the Copper Mountain mine, which has been extensively developed by the Lewishon brothers.

HAVEN'T AGREED YET.

President McIntyre Still Has No Contract With the Local Smelters.

According to Samuel McIntyre, who directs the destinies of the Mammoth mine in the Tintic district, he is still unable to reach an understanding with the valley smelters in regard to charges for reduction; consequently, the matter of resuming operations upon an exten-

sive scale is indefinite,
President McIntyre has made up his mind that he should pay a certain price, and no more, for the reduction of Mammoth ores and those who know him best are aware that when he once makes up his mind as to what he believes is right, he seldom changes it. It is claimed that the Mammoth's executive has an advantage in the con-The fact is, with the Tonopah troversy. The fact is, with the Tonopan out of the market temporarily, a scarcity of silicious ores has been created; consequently, the plants which have been treating these ores must look else. where and the Mammoth seems to be about the easiest available of any of the sources at the present time and, for this reason, Mr. McIntyre may be conceded a point or two before the negotiations cease.

A GREAT COPPER VEIN.

Development Progressing Satisfactorily At the Blackbird Mine.

Manager M. J. True, of the Blackbird Copper company's properties in Beaver county, returned from a trip to camp this morning well pleased with the condition of things at the mine. The forces are still drifting on ore on the 300-foot level and have proceeded for a distance of about 90 feet. The width of the vein will average. Mr. True states, 35 feet. The ore is much the same in character to that opened up in year by year; its vast mineral resources

CONSTRUCTION OF UTAH CON. SMELTER

Foundations for Additional Buildings Have Been Completed and Ready for Structural Iron.

WHAT THE EXTENSIONS ARE.

Twelve Additional McDougall Furnaces To be Installed -Joseph Dederich Completes His Stack Contract.

Down at the smelter of the Utah Consolidated Mining company, near Murray, work has been in progress on the enlargement of the plant for several weeks past.

The foundations for the new build-

ings, said Manager R. H. Channing today, are practically all in and within a very short time now the construction of the buildings proper will commence. The foundations for the new converter dust chamber and stack, the Me-Dougall furnaces and the roaster building are finished.

The extensions under way are as follows: An addition of 87 feet to the smelter building, thereby making it 464 feet long; this addition will contain two new reverberatory smelting furnaces 43 feet 6 inches by 17 feet; a dust chamber 56x27x18 feet, and a stack 5 feet 6 inches by 190 feet for the converters alone an addition to the roaster building 126x 65 feet, to contain 12 more McDougal calcining furnaces; and to take care of the extra horsebower required, as well as to have a stand-by engine to secure immunity from stoppages for engine overhauls and repairs, there will be a new Nordberg-Westinghouse engine generator. In addition to these main items, there will be sundry small ones, such as extra slag cars and hopper cars for ore, coal and calcines, and in addition to the machine shop and boiler

Contractor Josph Dederich has completed the task of building a fifty-foot addition to the main stack which has been in use since the smelter first start-

THE \$50,000 IS UP. Third Payment on the Columbia Mine to Be Made on Time.

Secretary and Treasurer Henry Caitrow, of the Ohio Copper company, has received advices from his eastern assoiates that \$50,000 has been placed to the credit of the mine purchase account and has been instructed to draw the checks to meet the third pay-ment on the company's property, the

Columbia mine, which is due on the Major Caitrow has wired that he will for this city next Friday, by which time Superintendent Tibbetts expects to have the Winnemuck mill in operation and regular shipments of high grade ores inaugurated toward

the smelters. CONCENTRATES.

Silver is quoted higher again today. The Grand Central is at the samplers with four cars of ore today.

Supt. C. A. Falco of the Cluster group in Bingham was in the city yesterday. Supt. Keetley of the Silver King Con. was down from the Park yesterday.

Supt. F. W. Sherman, of the Daly-West mine at Park City is in the city

Andrew J. Malloy, the well known expert and promoter, has arrived from New York.

The delinquent stock sales of the La Reine Galena, Wabash and Dexter are scheduled for today.

Two carloads of machinery for the Guffey-Galey oil wells near Farming-

An assessment of 14 cents a share has been levied on the stock of the Petro mine of Bingham. The new \$200,000 smelter at Sumpter,

Or., has been blown in and is said to be working successfully. The annual moting of the Badger Mining company is scheduled to for 10 a. m. on Tuesday next.

The stockholders' meeting of the Morrison Mining company, scheduled for yesterday, was postponed indefinitely. President Tony Jaeobson, accompanied by Director W. B. Jeffs, expects to visit that Alta property tomorrow.

Willard F. Snyder, general manager the Western Exploration company, has returned from a trip to the Balakalla mines in California.

Samples from the new copper ledge n the Columbus Consolidated, assayed vesterday, show values of better than

5 per cent copper. Vice President J. D. Wood of the Daly-West Mining company departed last night for California, accompanied

The ore and bullion settlements reported yesterday afternoon were re-ported as follows: Crude ores and oncentrates, \$48,900; base bullion, \$36,-00. Ttotal, \$84,900. The stockholders' meeting of the

Copper Ranch Mining company, scheduled for yesterday afternoon, was postponed until tomorrow afternoon at 2

Walter C. Orem has received word from Silver City, Ida., to the effect that an unexpected voin of ore has been encountered in the Twilight tunnel of the Trade Dollar Extension mine. A typographical error in Saturday's

made the output of silver during 1902 appear to be 16,391,800,97 ounces. in the comparative table showing the metal output of the state for the past two years. It should have been 12,391,-00.97 ounces instead. Adam Stopler of Dry Canyon, Tooele

county, who is working the Blue Jay mine in this rich district, was in the city a few days ago on mining He is taking out a shipment of ore which will assay 23 per cent lead, 23 ounces silver, \$3 gold and from 11 to 12 per cent copper.-Stockton Senti-

Superintendent Trenam reports reatly increased flow of water at the Beaver Con., amounting now to about 15 gallons per minute. They have been 15 gallons per minute. They have been able to hoist it thus far, but it looks as though a pump would re required in the near future. The new cage arrived

The Catawba company, owning 1 es to do some active work during the coming year. At the annual election, held last week, Judge Botkin was reelected president and manager, and Oscar Potter, Fred A. Smith, S. S. Martin, B. B. Hall and Elbert Stewart as directors.—Milford Times. claims in Beaver Lake district, propos

The Stateline Oracle came out a few days ago in holiday attire and contains a splendidly written article, embellished with a great many half tones, descriptive of the mines of that great camp, as well as those in the vicinity of Fay, Nev. The publishers deserve much credit for the enterprise displayed in getting out this edition.

Judge and Daly-West is authority for the statement that the recent laying off of a force of men at the former named plant was no for the purpose of cutting down expenses, but was done because they had finished their work and their services were no longer need-ed. Four carpenters and two painters wtre laid off. -Park Record.

The annual meeting of the Susie Gold Mining company, operating in the Park Valley mining district, was held yesterday afternoon and the following officers were chosen: Owen A. Bailey, president; Samuel Kirkman, vice president; D. F. Collett, secretary and treasurer; B. T. Lloyd and Matthew Haaga. Only the assessment work was done last year, but in all probability more work will be prosecuted this year.

UNDERTONE OF

Opening Was Weak and Sluggisl Lack of Orders Causing

Little Business Doing in Stocks. Traders and Speculators Being Apathetic.

New York, Jan. 5 .- A very languid interest was reflected in the opening dealings in stocks and the movement of prices was narrow and sluggish with the undertone heavy. United States Steel dropped % and the preferred %. the latter immediately rallying 1/2. Dearth of buying orders caused prices

read stocks rallied to a parity or slight.

was strong, Chicago & Alton rising 11/2, the preferred 4½ and Toledo, St. Louis & Western preferred 2½. Lackawanna rose 5¾, Delaware & Hudson 3, Chi-cago, Terminal preferred 4 and Atchion preferred, Northwestern and American Woolen a point or more. Brook-lyn Transit was down more than a point last night, causing prices to drop

Wabash preferred reversed its course of the morning and advanced a point Louisville & Nashville also moved up % and the entire southern and southto above 50.
